FROM

:

Mr. [REDACTED] Secretary

CIA

1. The "JIGSAW" Sub-Committee, while examining and outlining a program of national intelligence on international Communism, came to the conclusion that there appears to be a need for an interdepartmental periodical estimate of the current world Communist "line".
2. The material for such an estimate should be prepared with the cooperation of the IAC agencies, supervised by a special editorial board consisting of representatives of those agencies and coordinated in CIA.
3. The estimate, while issued periodically, would not be published at a rigidly fixed date, but composed and circulated at appropriate frequency, determined by the editorial board in accordance with prevailing conditions and intelligence needs.
4. It is suggested that the members of "JIGSAW" take this matter into consideration in the near future.
